## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Kodera et al.

Kodera et al. teaches a method for cleaning a polishing pad comprising imparting relative motion to the polishing pad, wherein the polishing pad is rotated about a center axis which is perpendicular to the polishing surface of the polishing pad and dispensing a wash material directly to the most center portion of the polishing surface and including the axis, (col. 19, lines 22-23 and col. 41, lines 33-44).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kodera et al. in view of Tolles.

Kodera et al. teaches all the limitations of the claims except for dispensing de-ionized water to the most center portion of the polishing surface. Tolles teaches that a

wash solution can be de-ionized water, (col. 8, lines 31-32). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the wash solution of Kodera et al. to be de-ionized water, as taught by Tolles, since Kodera et al. teaches supplying a cleaning solution to the pad after the polishing of the wafer and Tolles teaches de-ionized water as a cleaning solution.

***Allowable Subject Matter***

Claims 13 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-11 are allowed.
